- Associations
- Sports Education Providers

Our patented technology

Guaranteed for easy setup and dismantling of court without any tools

LITTLE STORAGE SPACE REQUIRED & TRANSPORT EASILY MANAGED

A complete Action Street Arena fits within a specially designed and fitted-out trailer.

ACTION STREET ARENA HAS A WIDE RANGE OF BENEFITS & CAPABILITIES

- It has been designed for use on grass, concrete, community halls and all other artificial surfaces.
- Suitable for most court sports and other activities such as yoga, fitness and dancing
- Action Street Arena is easy to assemble and dismantle whilst being easily compacted and stored.
- Each panel is made from strong, noise reducing materials and can be customised to correspond with your brand, advertising or team requirements.
- It can be used either indoor or outdoor and either during the day or at night.
- Safety, quality and accessibility are primary concerns so we ensure that every aspect of Action Street Arena is tested and complies with safety regulations.

An Action Street Arena can be customised to be manufactured in a variety of sizes with additional options such as netting, curved panels and stadium seating that are dependent on the sport or leisure activity and the event it is used for.

It is suitable for a range of sports and activities that include all sports played on a court, soccer, tennis, handball, hockey, volleyball badminton, yoga, dancing and other fitness activities.

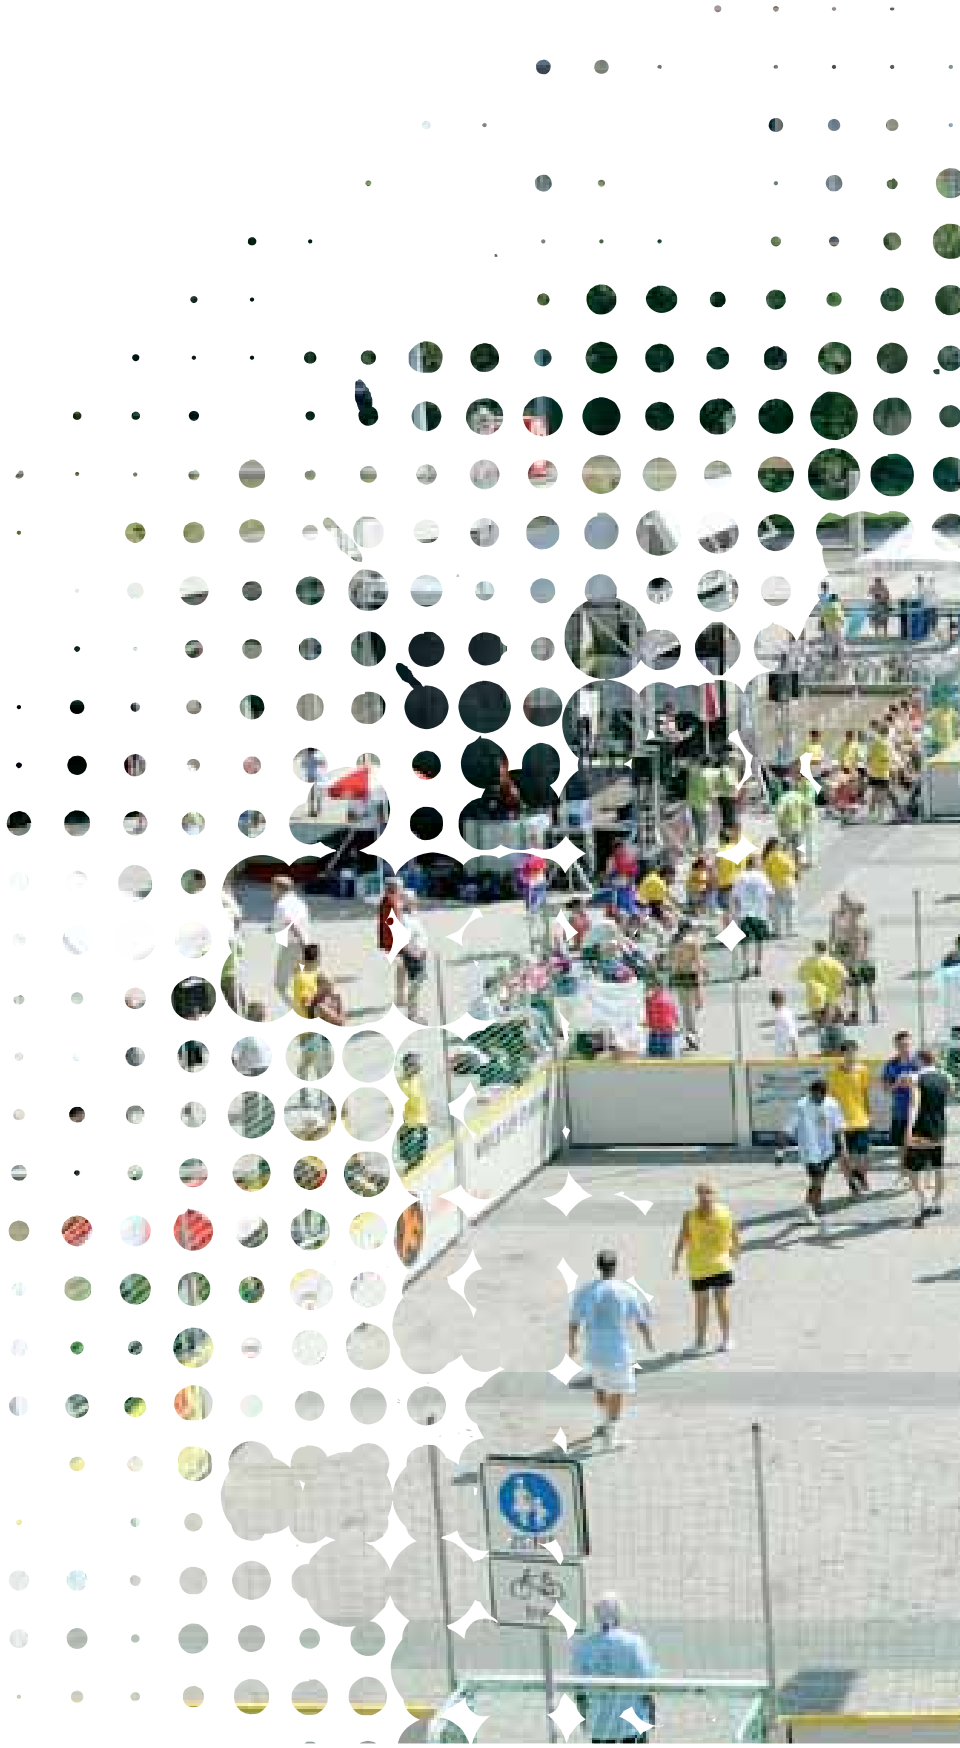

BEACH SOCCER

A further option for this multifunctional system. For public institutions such as swimming pools / spas or amusement parks we recommend permanent court installation with connector stands in ground sockets or for bolting to a concrete foundation (see image) without protruding braces as with mobile rings.
